

Montini Catholic High School
Algebra I Concepts

All students enrolled in Geometry or Honors Geometry for the fall of 2022 will take a diagnostic exam the first week of school to assess their retention of basic Algebra I concepts that are necessary to be successful in Algebra II. When the student is given the results, they will also be given remediation work for any concepts the student struggled with, upon completion their grade on the diagnostic will be adjusted. This packet covers the same concepts that are on the diagnostic exam. If done properly, this will hopefully alleviate the need for any remediation in the fall.

As you go through each topic, check your answer. If you are having difficulty, we have included different avenues for help:
